The figure above indicates that Greece has a highest CDS spread. Then, we can create the following graph to see its default risk. CDS spread can be used to calculate implied probability of government or companies defaulting.

9) Inflation

GT10 Govt: Generic United States 10 year government note

We can type first “GT10 Govt” and then add a function of “CPI YOY Index” using “add a security” under Chart Content to see the relationship between yield paid on 10 year government note and inflation.
